Three times the play, three times the earnings. Now, for the first time, you get three *different* shooting games in one when you install "Triple Hunt"™ Unique engineering and design lets you select "Hit the Bear,"™ "Witch Hunt,"™ or "Raccoon Hunt."™

Triple Hunt's built in versatility makes it possible to keep collections at a consistently high level

You can "rotate" the game in minutes without disturbing the cabinets simply by changing graphic panels (stored in the monitor module) and moving a switch on the PC Board to-

Hit the Bear.™ A modern video version of the classic bear shooting game. A large and small bear walk through a lush 3-D forest. When the bullseye is hit, the bear roars, rears up and turns

Witch Hunt.™ Players try to hit ghosts appearing in the windows of a mysterious haunted house, as well as witches and bats that fly across a stormy sky

Raccoon Hunt.™ Busy raccoons climb trees in an autumn forest scene. The more raccoons hit, the faster they climb

Various scores are given for each target hit. With a cross-hair target appearing on the screen for accurate sighting, players have unlimited rapid fire rifle shots. High score is displayed after the game is over.

Triple Hunt also features Atari's exclusive *new* coin door and coin mech design for jam-free, safe operation

Sure shot Options. Profit bullseyes include 3 different game selections, Coinage, including 1 coin per play, 2 coins per play or 1 coin for 2 plays. There's also adjustable game time, optional extended play and variable volume control

Service. The Easiest Target. Atari's exclusive built-in self-test and options check program lets you trouble shoot on the spot. And because gun and display modules are fixed in position when installed, line up from game to game is always accurate

Dimensions:

Gun Mount: Height 44", 111.76 cm, Width 25.25", 64.14 cm, Depth 26.5", 67.31 cm

Monitor Module: Height 66", 167.64 cm, Width 25.25", 64.14 cm, Depth 44", 111.76 cm

Telescoping connecting conduits let you place the Gun Mount 5 feet to 10 feet away from Monitor Module

Take Aim
